

Fire Industry Alliance – AFSPAB Scheme Register

Code of Conduct

The Fire Industry Alliance – AFSPAB Scheme (**Scheme**) Code of Conduct (**Code**) sets out the minimum standard of conduct, competence, integrity, and professionalism expected from Fire System Practitioners (**FSPs**) endorsed by the Scheme.

A copy of the Code is available on the Fire Industry Alliance website.

All FSPs are required to comply with the Code and all Scheme Policies and Procedures. Compliance must be with both the specific principles and with the spirit of these principles. They should not be narrowly interpreted or used to justify conduct otherwise taken to be unethical or contrary to the Code as defined by any reasonable person.

Fire Protection is an essential part of the Building and Construction Industry; and the Australian community depends on the Fire Protection Industry to help keep them safe. Community safety is in part dependent on Industry's professionalism, integrity, and quality of work. Scheme-endorsed FSPs are responsible to their community to observe high standards of conduct and ethical behaviour during their work.

The following are key expectations set out in the Code (please note, this list is not exhaustive – please refer to the full Code). FSPs endorsed by the Scheme must:

- ensure public safety, health, and welfare is paramount in all their practices, which is best maintained through high quality work that complies with all relevant Codes and Standards;
- ensure their work adheres to all relevant State and Federal legislative and regulatory requirements, Australian Standards, and lawful and reasonable directions and determinations by the Scheme;

- ensure their work satisfies needs of consumers and maintains public safety;
- perform their duties competently and within the required level of expertise and experience;
- act with a level of professionalism that reflects well upon and enhances the Fire Protection Industry;
- constantly improve their knowledge and skills in the field of fire safety, and maintain a satisfactory level of competence;
- perform professional services only within the scope of their accreditation, for which they are authorised to perform;
- be honest and truthful in presenting data and estimates, professional opinions, and conclusions, and in their public statements dealing with professional matters;
- take reasonable steps to ensure that any person they engage to undertake or assist with the work only performs work which they are authorised to perform, and that they perform that work to a reasonable standard;
- refrain from conduct which is dishonest, unethical, false, corrupt, criminal, misleading, deceptive, unconscionable, or which is otherwise improper or brings the practice of fire safety into dispute; and
- adhere to Scheme Policies and Procedures.

A breach of the Code may result in disciplinary action being taken, pursuant to the Complaints, Appeals & Disciplinary Procedure.

The Fire Industry Alliance does not accept any responsibility for the conduct of FSPs. All FSPs are chosen through commercial practices and are selected entirely at the risk of the person engaging their services.

Notice to Endorsed Practitioners

PRACTITIONERS MUST NOT SEND A PROXY TO AN INSPECTION UNLESS THAT PROXY IS ENDORSED BY SCHEME IN THE CORRECT CATEGORY (OR CATEGORIES). FAILURE TO COMPLY WITH THIS REQUIREMENT MAY COMMENCE A DISCIPLINARY PROCESS.

Further Information

If you have any questions regarding this Document, please contact the Administrative Committee: AFSPAB@firealliance.com.au.
